The SupaVent, a new generation wind powered ventilator which provides superior starting torque in light breezes.

The 250 mm diameter ceiling register can be simply opened and closed to suit conditions.

EVERY HOME NEEDS ADEQUATE VENTILATION.

Many homes today are closed tight during the day, for security reasons. This restriction on air movement can cause stale air and odours to accumulate, trap heat, and increase the concentration of household pollutants. The result is a more unpleasant environment with increased levels of allergens and asthma triggers.

Constant movement of air within the home and exchange of air with the external environment will help to alleviate these problems. This can only be achieved by forceful removal of air with the facility for replacement air to enter the home.

VENT-A-ROOM PROVIDES THE ANSWERS.

A *vent-A-room* System will draw air from within the home thereby enabling, cooler, fresh air to enter from windows and doors. Air movement can be controlled through the adjustable ceiling register. Its features include:

1. Controllable ventilation all year round.
2. Removes trapped heat.
3. Dilutes the concentration of household pollutants.
4. No energy costs; relies on wind energy.
5. Does not jeopardise home security.

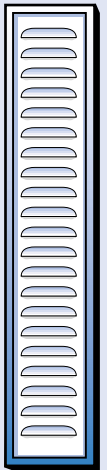

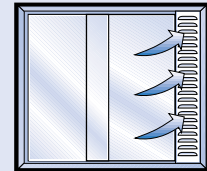

THE COMPLETE SYSTEM TO VENTILATE THE HOME.

The *vent-A-room* System consists of:

1. The SupaVent Domestic Ventilator. Australian designed and manufactured with twin stainless steel bearings. Eight colours available.
2. Two metres of flexible tubing to reach from the SupaVent to the ceiling register.
3. A 250 mm round, controllable ceiling register. Easily installed and operated.

THE IDEAL PARTNER

It is imperative to provide adequate opportunity for replacement air to enter your room. This can be achieved, without jeopardising security, by installing an Edmonds' wind-O-vent as part of a complete natural household system. With the removal of trapped air by the vent-A-room System, fresh air enters through this louvred window panel that permits the window to be secured by a bolt lock.

Edmonds Products (Aust) warrants SupaVent when used on domestic premises for 15 years against defects in workmanship, parts, or mechanical failure. (See full warranty for conditions.)
